

Undercounter Stacking Kit

For Undercounter Refrigerators and Freezers

The undercounter refrigerator and freezer stacking kit is the perfect solution for areas tight on space. The stacking kit provides the ability to refrigerate and freeze while meeting guidelines around standalone refrigerators and freezers for vaccine and medication storage. The stacking kit is for use in hospitals, clinics, private health practices, pharmacies, and more.

Stacking Kit

Stacking kit includes hardware and brackets needed to stack 2 undercounter units.

Available in blue bacterial-resistant powder-coated steel or stainless steel

Compatible with all Helmer undercounter refrigerator and freezer models.
