

Annual Preventative Maintenance

Helmer Scientific's high-performance medical-grade equipment requires regular maintenance for optimum performance. It is important to regularly maintain all scientific equipment to reduce failures and protect your precious medication, vaccine, blood and patient samples.

We offer a range of Service Agreements offering Preventative Maintenance, Calibrations, Repairs, Installations, Loaners, and Removal of old equipment.

Why Should My Facility Perform Preventative Maintenance?

Don't Suffer through the Pains of Unmaintained equipment:

- Failure of device
- Long repair wait periods
- Loss of Product
- Delays in new product installations
- Managing Preventative Maintenance properly following IAW manufacturer requirements.

Maintained Equipment is Better Performing:

- Reduce service costs
- Compliance management and documentation
- Decrease disruption during product failure or new product implementation
- Spend less time and effort managing equipment
- Operational efficiency and Convenience

25% of historical unit failures could have been prevented with regular maintenance. Preventative Maintenance is proven to save Helmer customers \$667 to \$1921 per visit on average. Well maintained scientific equipment increases longevity, instills confidence in users, and complies with regulations.
